

DISHWASHERS WITH A SOLID REPUTATION

Swiss Commercial Equipment started its operations in Canada in 1992. Swiss introduced to North America dishwashers that had been engineered and manufactured in Switzerland since the late 1960's. Technology has evolved and so have the Swiss dishwashers. Through this evolution, the main concern has remained to satisfy the growing need for cleaner and better results, low cost and trouble free operation with the highest possible output.

The mission at Swiss Commercial Equipment is to satisfy these needs and respect the environment. To that end, our dishwashers have low water, electrical and chemical requirements. One look at the Swiss 25PLC, or the upright model, Swiss 65PLC, is enough to convince you of the quality of these products.

Swiss Commercial Equipment delivers technologically advanced dishwashers with a solid reputation. Visit our website to learn more about the Swiss 25PLC and the Swiss 65PLC as well as our other commercial products.

65PLC

The Swissh 65PLC is the highest quality upright dishwasher found in the market. With its maximum output of 54 racks per hour, the Swissh 65PLC answers the most fundamental demands of every operator: great results, low operation cost and durability. Swissh is able to satisfy these demands and remain environmentally friendly. It uses only 3 liters (0.79 US gal) of water per wash: that's less water and chemicals down the drain. Now that's innovation; environmentally friendly and more money in your pocket!
